

# Jano González

Berlin, Germany | [info@janogonzalez.com](mailto:info@janogonzalez.com) | [github.com/janogonzalez](https://github.com/janogonzalez)

## Profile

---

Senior Software Engineer with 15+ years experience driving large projects in both individual contributor and team lead positions.

I enjoy mentoring and public speaking, having presented in conferences like [LISA](#), [RubyNation](#) and [JRubyConf](#).

## Experience

---

**Staff Engineer – Contentful** **Apr 2020 – Jun 2021**

- Enabled rolling out GraphQL to thousands of customers by introducing a new tenant type

**Senior Software Engineer – SoundCloud** **2014 – 2020**

- Secured 6 extra years without space issues in the main database cluster by extracting social graph services from the Rails monolith. This includes introducing microservices with their own storage and events, coordinating the integration of the services with 5+ engineering teams and safely rolling out traffic to millions of users.
- Identified lack of new contributors to the Rails monolith as a risk. Mitigated the risk by introducing an ownership plan and aligning 5+ engineering teams around it
- Improved resource usage by 50% and enabled daily deploys by migrating the Rails monolith from bare-metal to Kubernetes

**CTO – HopIn** **2012 – 2013**

- Designed and implemented the backend for an image sharing social network
- Recruited and led a team of 5 developers

**Senior Software Engineer – Continuum** **2011**

- Designed and implemented middleware to send SMS, email and social network notifications

**Engineering Manager / Project Manager – Taisa** **2008 – 2010**

- Led teams of up to 7 developers to deliver second factor authentication middleware for banks and retail

**Software Engineer – Depósito Central de Valores** **2005 – 2008**

**Software Engineer – Everis** **2005**

## Education

---

**Software Engineer** – Universidad del Bío-Bío, Chile **2000 – 2004**

## Technical Skills

---

- **Languages:** Ruby, Scala, JavaScript, Go, Java
- **Technologies:** MySQL, Kafka, Cassandra, Kubernetes, AWS, Prometheus
- **Other:** Data Structures and Algorithms, Distributed Systems, Site Reliability Engineering
